## SKILLS

**Skills:** JavaScript | TypeScript | React | Angular | CSS/SASS | MySQL | Power Apps | Agile | Figma | Adobe XD | Independent learning

## WORK EXPERIENCE

**Yorkshire Water**                                                                                                          **Hybrid**
*Lead React Developer*                                                                                   *May 2022 – Present*

- Developed responsive web applications with React, using component libraries such as MUI and custom design systems.
- Modular code, reusable components.
- Built software to high accessibility standards, WCAG 2.1 AA.
- API integration to RESTful APIs with Axios
- Jest unit testing, Selenium automated testing.
- Manage tasks and report on progress using Azure DevOps Boards.
- Git for version control to effectively manage code changes and collaboration.
- Strong communication skills and demonstrable ability to manage upwards and articulate decision making and context.
- Outstanding ability to interact and communicate with others,
- CI/CD with Azure DevOps Pipelines
- Keen to foster an environment of best practice and standardisation underpinned by quality documentation.
- Reading and understanding JSON schema for effective data handling.

**Atos**                                                                                                                          **Hybrid**
*Angular Developer*                                                                              *November 2021 – May 2022*

- Develop web applications in Angular using the Government Design System (GDS) and WCAG 2.1 AA standard
- Communicate with backend services using HttpClient in Angular (API calls).
- Manual unit testing of code.
- Reading and understanding JSON schema for effective data handling.
- Manage and report on working progress using Azure DevOps Boards.
- Utilise Git for version control to effectively manage code changes and collaboration.
- Strong communication skills and demonstrable ability to manage upwards and articulate decision making and context.
- Working autonomously or independently in an Agile environment, to develop high standard web applications for the client.
- Keen to foster an environment of best practice and standardisation underpinned by quality documentation.

**Atos**                                                                                                                          **Hybrid**
*Power Apps Developer*                                                                   *February 2021 - November 2021*

- Built canvas web applications in Power Apps, with SQL Server Management, REST APIs, Power Automate and Power BI.
- Create my own UI based on requirements from user stories and develop those into a web application.
- Regularly present and demonstrate back to the client.
- Developed company wide documentation on applying GDS standard in Power Apps development.

## ADDITIONAL INFORMATION

- Full UK Driving Licence
- Right to work in the UK

Security clearances:
- DBS (Disclosure and Barring Service)
- BPSS (Baseline Personnel Security Standard)
- SCe (Security Clearance Enhanced) for NCA
- SC (Security Clearance), for NCA (National Crime Agency), MoD (Ministry of Defence)

## EXTRA CURRICULAR & INTERESTS

- Committee board member to make design decisions for improvements on UX and accessibility to the company wide design system
- Gym, Running, Learning a new skill (in lockdown this was sewing).

## EDUCATION

**Birmingham City University**                                                        **First Class**
*BA (Hons) Design Management*                                               *Graduation: July 2020*
Studentship award - Awarded to the best performing student of that year, I also graduated with an 85% average in my final year.

- Design Thinking and Business
- Design strategy
- User Experience
- People, Client and Project Management
- Research
- Problem solving

**University of Bradford**
*BA (Hons) Web Design and Technology*                                              *2016 - 2018*

## COURSES & CERTIFICATIONS

- Agile Awareness Level 1 Certification
- Data & SQL Programming
- JavaScript Algorithms & Data Structures - 150 hours
